*The IMS Bulletin*
Vol. 25 No. 6, 1996, 667-689.

# Author Index to Volume 25 (1996)

This index lists the authors of papers, either presented in person or by title, which were published in *The IMS Bulletin* during 1996. Each and every author of multi-authored abstracts is included in the index. The page numbering of the six issues of 1996 is as follows:

**Vol. 25, No. 1, January/February 1996:**
By Title, pp. 4-6 (96t1-6)
In Person, pp. 19-31: Richmond, Virginia (243rd IMS Meeting)
**Vol. 25, No. 2, March/April 1996:**
By Title, pp. 101-102 (96t7-9)
In Person, p. 102: Richmond, Virginia (243rd IMS Meeting)
In Person, pp. 110-140: Gaithersburg, Maryland (244th IMS Meeting)
In Person, pp. 155-166: Pullman, Washington (245th IMS Meeting)
**Vol. 25, No. 3, May/June 1996:**
In Person, pp. 272-318: Chicago, Illinois, IMS Annual Meeting (247th IMS Meeting)
**Vol. 25, No. 4, July/August 1996:**
By Title, pp. 425-426 (96t10-15)
In Person, pp. 378-423: Sydney, Australia (246th IMS Meeting)
In Person, pp. 434-448: Chapel Hill, North Carolina (248th IMS Meeting)
**Vol. 25, No. 5, September/October 1996:**
By Title, pp. 517-520 (96t16-26)
**Vol. 25, No. 6, November/December 1996:**
By Title, pp. ?-? (96t27-32)

| Author and Title | | Abstract | Issue | Page |
|---|---|---|---|---|
| **Aban, I. B.** | *Properties of Test Statistics Applied to Residuals in Failure Time Models* | 247-74 | No. 3 | 295 |
| **Abramovich, Felix** | *Wavelet Thresholding via a Bayesian Approach* | 246-8 | No. 4 | 380 |
| **Acosta-Mejía, C. A.** | *ARL-Unbiased Control Charts for Monitoring the Fraction of Nonconforming Units* | 244-55 | No. 2 | 130 |
| **Adler, André B** | *Unusual Laws of Large Numbers for $l_p$ Random Elements* | 247-107 | No. 3 | 305 |
| **Adler, Robert J.** | *Level Crossings of Absolutely Continuous Stationary Symmetric alpha-stable Processes* | 248-34 | No. 4 | 443 |
| **Agustin, Marcus A.** | *A Stopping Criterion for Software Reliability Testing* | 247-88 | No. 3 | 299 |
| **Ahmed, S. E.** | *Using Incomplete Prior Information in Regression Analysis* | 245-27 | No. 2 | 163 |
| **Ahmed, S. E.** | *Asymptotic Theory of Simulation Estimation of Coefficient of Variations* | 245-26 | No. 2 | 163 |
| **Akman, H. Olcay** | *A Study of Log-logistic Model in Survival Analysis* | 243-31 | No. 1 | 28 |
| **Aldous, David J.** | *Brownian Excursions, Critical Random Graphs and the Multiplicative Coalescent* | 247-5 | No. 3 | 273 |
| **Alexander, K. S.** | *Approximation of Subadditive Functions and Applications in Statistical Mechanics* | 247-36 | No. 3 | 282 |
| **Anderson-Cook, C.M.** | *One-Way Analysis Strategies for Cylindrical Data* | 244-43 | No. 2 | 126 |
| **Antzoulakos, D. L.** | *Exact Distributions of Succession Quota Random Variables in a Binary Sequence of Order k* | 96t-1 | No. 1 | 4 |
| **Antzoulakos, D. L.** | *Probability Distribution Functions of Succession Quotas in the Case of Markov Dependent Trials* | 96t-16 | No. 5 | 517 |
| **Aparisi, Francisco** | *The Effect of Autocorrelation in the Multivariate T-Squared Control Chart* | 244-56 | No. 2 | 131 |
| **Arachchige, D.H. Liyana** | *An Alternative Approach to Clustering* | 246-28 | No. 4 | 387 |
| **Arratia, Richard** | *Poisson Process Approximation for Sequence Repeats and Sequencing by Hybridization* | 247-30 | No. 3 | 280 |
| **Ayatollahi, S.M.T.** | *Efficient Statistical Modelling for Studying Breast Feeding Pattern in Iran* | 246-120 | No. 4 | 416 |
| **Baade, Ingrid** | *Cook's Distance for Models Other Than Ordinary Least Squares* | 246-113 | No. 4 | 414 |
| **Baddeley, Adrian J.** | *Quermass-interaction Processes* | 96t-27 | No. 6 | 579 |

| Author and Title | | Abstract | Issue | Page |
|---|---|---|---|---|
| **Bailey, Trevor** | *Use of Wavelets in the Detection of Underwater Sound Signals* | 246-6 | No. 4 | 379 |
| **Ball, Roderick D.** | *Estimating the Number of Genetic Components in an Effective Factors Model: a Gibbs Sampling Approach* | 246-128 | No. 4 | 419 |
| **Banks, David** | *The Comparative Performances of New Wave Response Surface Analyses: An IC Example* | 244-52 | No. 2 | 129 |
| **Barbour, A. D.** | *Stein's Method for Compound Poisson Approximation* | 247-1 | No. 3 | 272 |
| **Barron, Andrew** | *Adaptive Model Selection and the Index of Resolvability* | 247-115 | No. 3 | 307 |
| **Barron, Andrew** | *Adaptive Selection, Neural Networks, and Information Theory in Nonparametric Estimation* | 246-39 | No. 4 | 390 |
| **Basak, Gopal K.** | *Stability and Limit Theorems for Random Degenerate Diffusions* | 247-47 | No. 3 | 286 |
| **Bashtannyk, David M.** | *Conditional Density Estimation* | 246-89 | No. 4 | 406 |
| **Baxter, Rohan** | *Fitting Finite Gaussian Mixture Models Using Minimum Message Length Estimation* | 246-99 | No. 4 | 410 |
| **Beardah, Christian** | *Exploratory Methods for Detecting Change Points in Time Series Using Kernel Density Estimation Techniques* | 246-88 | No. 4 | 406 |
